Papers does not have to be a presentation, they can also be a suggestions to new or old procedures, case presentation, presentation of a problem case, introduction to a debate.

A paper can be as short as 10 minutes. An interesting case presentation can sometimes call for a discussion lasting hours and lead to important Optometric insights.

You are also invited, if you don't have a paper this year – the symposium will always provide you with the newest insight into our profession.

There will be all necessary AV equipment available for your presentation including video-projection, so if you have your presentation on Power Point or similar programs, we can support you.
